

Correlation between DA chromaticity 5 and chromaticity 15

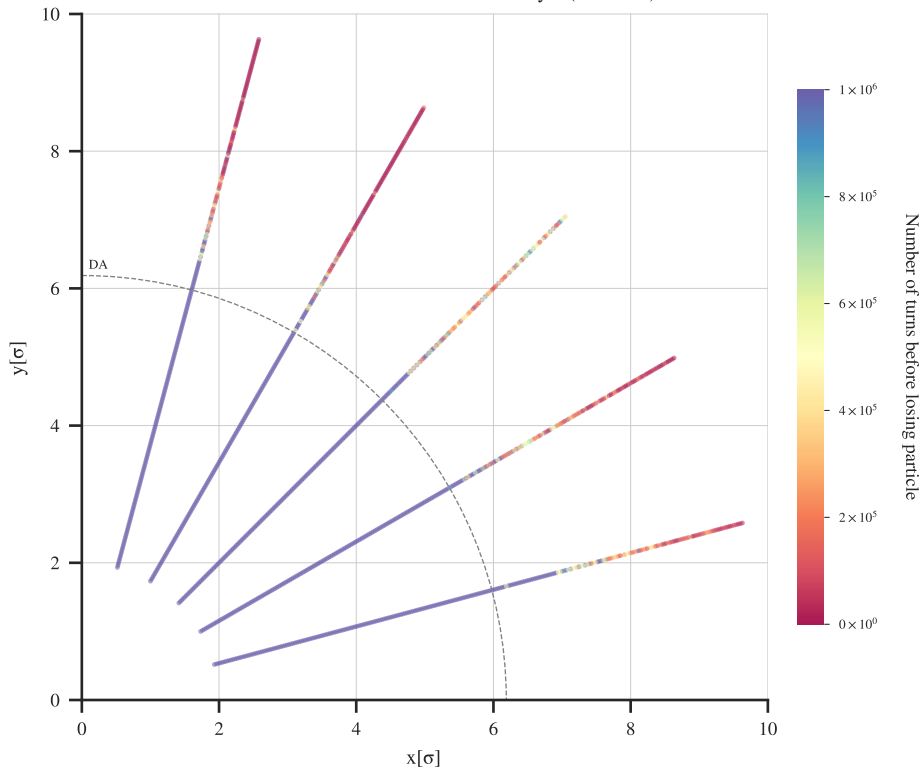

Difference between DA chromaticity 15 and chromaticity 5

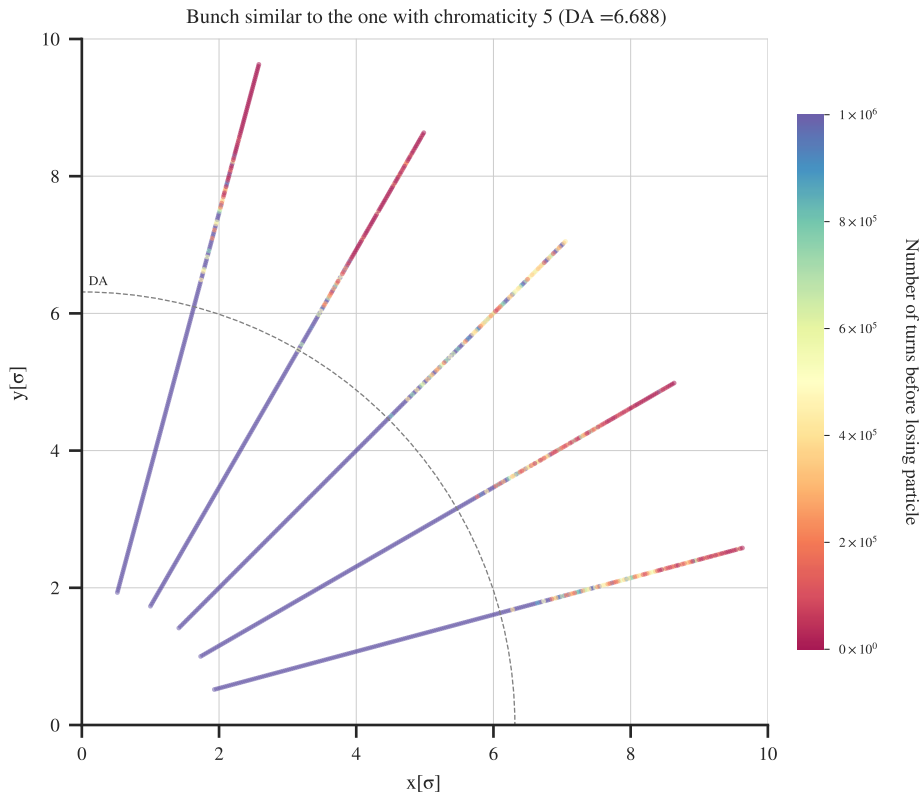

Survival plot for bunch 525 with chromaticity 15, DA = 6.1875

Bunch similar to the one with chromaticity 5 (DA =6.5)

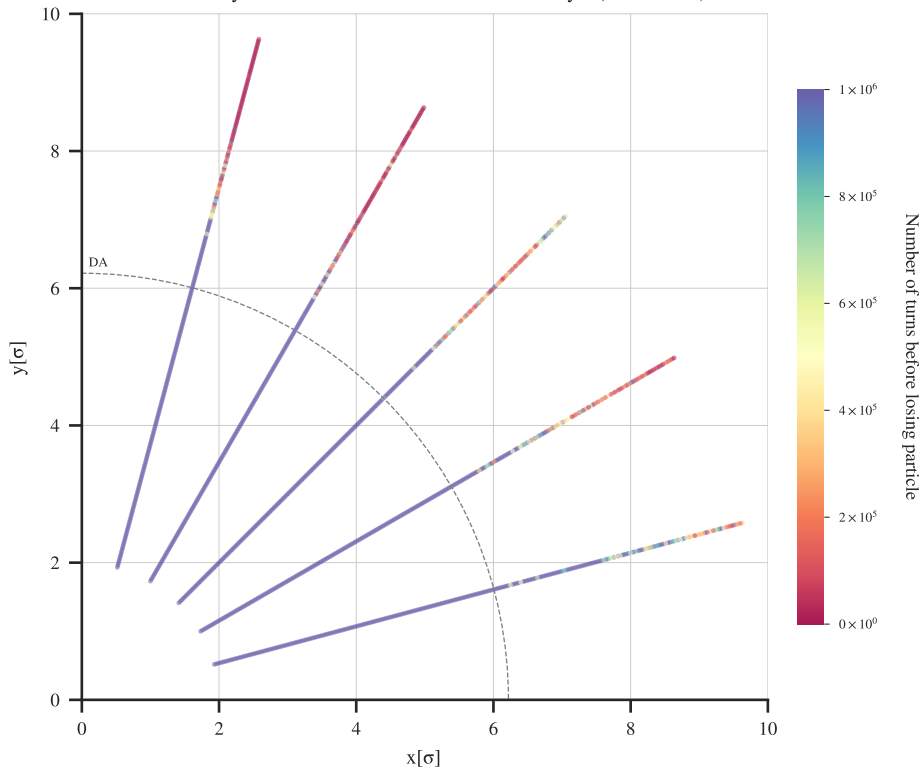

Survival plot for bunch 1132 with chromaticity 15, DA = 6.3125

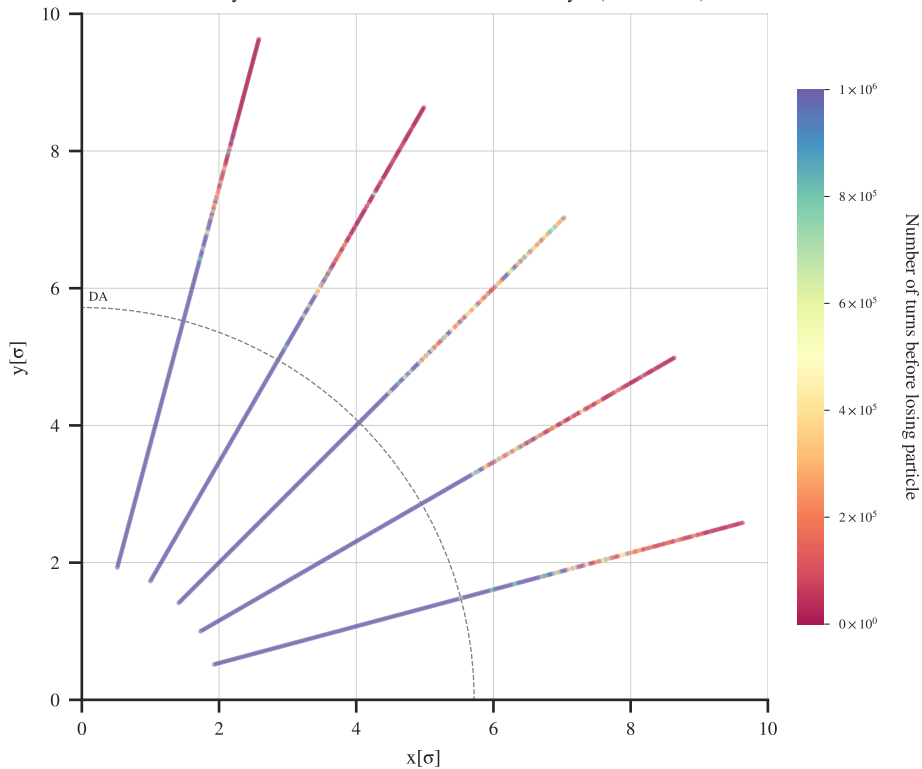

Survival plot for bunch 2622 with chromaticity 15, DA = 6.21875

Bunch very different from the one with chromaticity 5 (DA = 8.344)

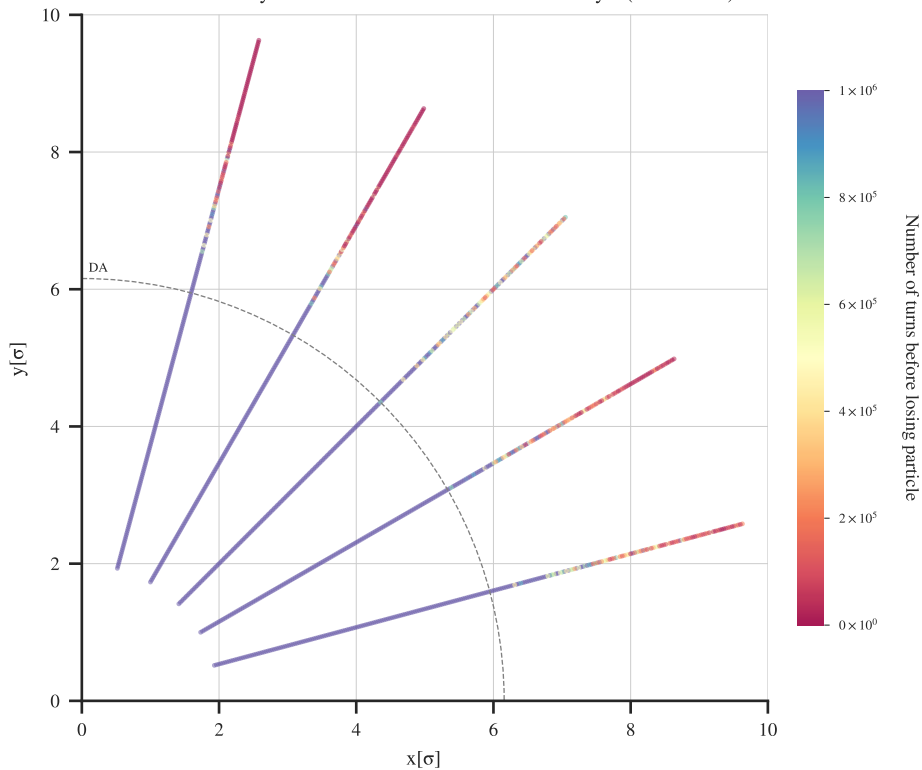

Survival plot for bunch 3009 with chromaticity 15, DA = 5.71875

Bunch very different from the one with chromaticity 5 (DA = 8.938)

Survival plot for bunch 210 with chromaticity 15, DA = 6.15625

Bunch moderately different from the one with chromaticity 5 (DA =7.188)

Survival plot for bunch 756 with chromaticity 15, DA = 6.0625

Bunch moderately different from the one with chromaticity 5 (DA = 7.125)
